

Fill-in-the-Blanks

Instructions: While watching Domain 4, fill in the missing words according to the information presented by the instructor. [References are found in the brackets.]

Image, SVG, and Canvas Elements

1. As users add images onto webpages, they should know the image's dimensions so they can scale it accordingly. [Add Images]
2. Use either a table or CSS when lining up images in rows or columns. [Image Layouts]
3. When adding a hyperlink to an image, make sure the img tag is surrounded by the a tag and not the other way around. [Image Links]

Video and Audio Formats

4. In order to have a play button on a video in HTML5, the attribute and value elements needs to be added to the video tag. [Video and Source Tags]
5. Audio tags should have the control attribute added to allow a user to control when the audio plays. [Audio and Source Tags]
6. When using .vtt files, the two most common formats are captions and subtitles. [Track Tag]
7. An iframe is essentially a frame inside of a webpage that holds content and allows you to put one HTML file inside of another. [iFrame Implementations]
